Dear Health Care Professional,

As part of the Livingston emergency preparedness program, the Health Department is required to make plans for an emergency vaccination/antibiotic distribution clinic. To accomplish this goal, we are recruiting volunteer physicians, nurses, pharmacists and other health professionals to help staff this clinic. We will also need non medical personnel to do other duties such as registration, ushers, and monitoring.

As you can imagine, a lot of help would be needed to operate such a clinic. It may need to operate for many days and work would be divided into shifts. Federal Government resources would provide supplies. All Township departments would be helping with such a clinic, but Livingston Township does not have sufficient medical personnel on staff and this is where your skills and time commitment would be needed.

There would not be a lot of time commitment in volunteering to be on our emergency call list. There will be a short training session and perhaps a yearly update.

If you or any of your staff are able to volunteer for an emergency clinic, you may contact us via our e-mail address, health@livingstonnj.org. We would like to be able to develop this list within a month. Thank you for your cooperation.
