

April 2017

FirstEnergy Corp. is scheduling tree pruning work in Livingston to help prevent outages and related problems.

All affected residents of **Eisenhower Parkway, Columbia Turnpike, W. Hobart Gap Road, Hillside Avenue, Peach Tree Hill Road, Walnut Street, Passaic Avenue, S. Orange Avenue**, and surrounding neighborhoods will receive a green and orange door hanger from FirstEnergy explaining the necessary pruning.

Customers that require extensive pruning and tree removal will receive an orange door hanger requiring signed permission.

FirstEnergy will be pruning branches that have grown in around the power lines over the past four years.

They are obtaining signed permission from private properties to selectively remove tall-growing-woody-plant species (and apply herbicide to that stump to prevent re-sprouting) within the right-of-way and occasionally off right-of-way tree which threatens service.

They are also obtaining signed permission from property owners to remove dead, dying, or hazard trees. Limbs and branches will be taken away. All firewood will be cut into fireplace length and will remain on the private property.
